Career Objective

Aspiring WordPress Developer with a background in law and a strong foundation in **plugin development, PHP, MySQL, REST API integrations** and **WordPress customization**. Experienced in **creating custom plugins, managing local development environments**, and **version control with Git**. Combining research skills, problem-solving, and attention to detail from legal training to deliver efficient, user-focused solutions. Seeking **remote opportunities** in WordPress development.

Technical Skills

WordPress: Plugin development, theme customization, shortcodes, custom REST API endpoints, admin pages

Languages & Tools: PHP, HTML5, CSS3, MySQL, Git, GitHub, DDEV

Other: Responsive design, debugging, wpdb queries, local/remote environments

Projects

- **Visitor Tracker Plugin** – Built a plugin to record visitor IP, user agent, and timestamp into a custom database table using \$wpdb.
- **Dynamic Shortcode Plugin** – Developed a plugin for generating personalized greetings and displaying dynamic server-based dates/times.
- **Custom Admin Page Plugin (Demo)** – Created a WordPress plugin that adds a custom settings page inside the WP dashboard.
- **Portfolio Website** – WordPress-based portfolio site showcasing personal projects and plugins.
- **Custom REST API Endpoint Plugin** — Engineered a WordPress plugin that registers a custom REST API endpoint (/wp-json/custom/v1/data) to fetch, create, and return structured JSON responses.

Education

BALLB (Bachelor of Arts + Bachelor of Laws)

BMS College of Law | 2019 – 2024

Certifications

Responsive Web Design Certification – freeCodeCamp (HTML & CSS)

Currently learning: Advanced WordPress Development & PHP/MySQL

Additional Experience

Completed multiple legal internships (2019–2024), building transferable skills in research, analysis, client communication, and detailed documentation—valuable in plugin development and technical writing.

Strengths

- Strong problem-solving mindset
- Attention to detail and persistence in debugging
- Research-oriented approach to learning new frameworks and APIs
